

Technical data sheet - TS19

Description

A luxurious auditorium chair designed to provide optimum comfort. Elegant in its design, TS19 features a sprung seat and moulded foams to provide outstanding ergonomic support

Features

- Designed for comfort with exceptional wraparound lumbar support
- Enclosed, damped, spring-tip mechanism for safety and smooth, silent action
- Attractive wood reveal to backrest
- Timber armrests, end panels and outerback
- Optional writing tablet

Seat Widths (Centre to Centre)

Standard chair: 500 - 550mm

Tip-up Mechanism

Noise and vibration free mechanism with lubricated resin silencer.

Waveform Spring

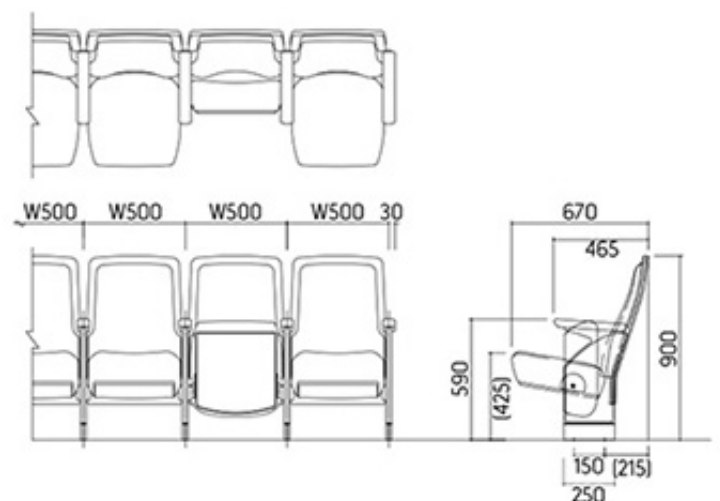

Used in luxury car seats, this system of springs ensures balanced load distribution across the seat. The springs support the body in an ergonomically correct posture, improving blood circulation and reducing fatigue.

Removable Seat and Back Covers

One touch, tool free removal of seat and back covers for easy maintenance.

Dimensions

500w chair shown; available in widths up to 550mm. All dimensions are nominal.

Standard Specification

- Seat: Pressed steel frame with serpentine springs. Moulded polyurethane foam, upholstered.
- Back: Moulded polyurethane foam, upholstered with outer back panel in plywood with PU coating.
- Tipping Mechanism: Damped, self rising spring tip mechanism.
- Armrests: Solid wood with PU coating.
- Leg: Die cast aluminium alloy with powder coated finish, standard colour black. Leg cover in moulded plastic. Floor fixed.
- Wood finish: plywood with PU coating finish; see Wood Finish Options below.
- Fabric: To customer specification.
- Writing Tablet: Melamine laminated plywood. Anti-panic folding mechanism.

Options

Under seat panel

Spacia Seat

Excellent support with reduced material use. Allows free movement of the lower leg for improved circulation.
